

Prof. Paolo Sammarco

Associate Tenured Professor at the University of Rome "Tor Vergata", Rome, Italy, Dipartimento di Ingegneria Civile e Ingegneria Informatica (DICII). His teaching is in "Fluid Mechanics", "Coastal Engineering" and "Analytical Methods for Solution of Differential Equations"; he has tutored numerous M.Sc. and Ph.D. thesis dissertations, also jointly with the ENPCParisTech. His research interests span: (i) mathematical theories of the generation and propagation of impulsive waves caused by landslides, (ii) fluid-structure interaction, (iii) wave energy, (iv) nonlinear phenomena in wave-current interaction and wave-wave interaction; he has published

more than forty papers in refereed Journals (JFM, JWPCOE, APOR, PRS-A, NHESS) and Conference Proceedings. He also served as a consultant in large scale Harbour and Coastal Projects. Prof Sammarco holds a Ph.D. in Civil and Environmental Engineering from the Massachusetts Institute of Technology, Cambridge (MA), 1997.
