

Prof. Barbara Zanuttigh

Associate Professor of Hydraulics at the University of Bologna, Visiting Scientist of Coastal Structures at Delft University of Technology and research member of CONISMA. PhD in Hydraulic Engineering in 2002. Main research interests: wave-structure interaction processes, coastal risk assessment and wave energy. Scientific responsible of a number of European and international projects, a.o. FP7 THESEUS (www.theseusproject.eu, as coordinator) and MERMAID (www.mermaid-project.eu). Author of a number of referred papers (h-index=17, scopus), and editor of monographic volumes. Associate Editor, Marine and Wind Energy section, for “Renewable and Sustainable Energy Reviews”, edited by Elsevier. Member of the “EurOtop” author team in the updated Overtopping Manual to appear in 2016. In charge of the course of Maritime Hydraulics since 2006, supervisor of many PhD students and Research Fellows.
